4:Teaches:

The image shows a screenshot of a 'Result Grid' window. At the top, there is a title bar with 'Result Grid' and a 'Filter Rows:' button. Below the title bar is a table with two columns: 'teacher_id' and 'course_id'. The table contains 15 rows of data, with the last row showing 'NULL' for both columns. The rows are as follows:

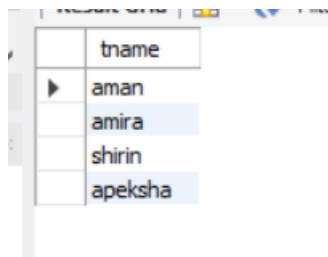

teacher_id	course_id
109	24500
113	24500
112	24502
101	24503
103	24504
105	24505
108	24505
102	24506
102	24507
104	24511
107	24511
111	24511
106	24512
110	24512
NULL	NULL

→Questions:

1)

```
/*find the names of all teachers in computer department who have salary greater than 70000*/  
select t.tname  
from teacher t,department d  
where t.dept_id=d.dept_id  
and d.dname="Computer"  
and t.salary>70000;
```

Output:

A screenshot of a database query result window. It shows a table with one column named 'tname'. The table contains four rows of data: 'aman', 'amira', 'shirin', and 'apeksha'. The row containing 'amira' is highlighted with a blue background.

tname
aman
amira
shirin
apeksha

2)

```
/*find the names of teachers who are working in IT department*/  
select t.tname  
from teacher t,department d  
where t.dept_id=d.dept_id  
and dname="IT";
```

Output:

Result Grid	
	tname
▶	shaily
	ahruti
	leena

3)

*/*find record of teacher name "ajay" and "sameer" using in construct*/*

- `select * from teacher t,department d
where t.tname in("ajay","sameer")
and t.dept_id=d.dept_id;`

Output:

Result Grid		Filter Rows:		Export:	Wrap Cell Content:		
	teacher_id	tname	dept_id	salary	dept_id	dname	phone_no
